

Amendments To The Specification:

In the English translation document, please delete the term --Description-- at page 1 line 1, before the title.

In the English translation document, please amend the title at page 1 lines 3-5, as follows:

Communication arrangement and transmission unit for information transfer over ~~at least one~~ a transmission line and a circuit arrangement for connection to the transmission unit

In the English translation document, please add the section heading and paragraph at page 1 line 6, after the title, as follows:

--CROSS REFERENCE TO RELATED APPLICATIONS

This application is the US National Stage of International Application No. PCT/DE03/02673, filed August 8, 2003 and claims the benefit thereof. The International Application claims the benefits of German application No. 10240140.3 DE filed August 30, 2002, both of the applications are incorporated by reference herein in their entirety.--

In the English translation document, please add the section heading and paragraph at page 1 line 6, after the newly added CROSS REFERENCE TO RELATED APPLICATIONS section, as follows:

--FIELD OF INVENTION

This invention relates to a communication arrangement and transmission unit for information transfer over a transmission line and a circuit arrangement for connection to the transmission unit.--

In the English translation document, please add the section heading at page 1 line 6, after the newly added FIELD OF INVENTION section, as follows:

--BACKGROUND OF INVENTION--

In the English translation document, please add the section heading at page 4 line 21, as follows:

--SUMMARY OF INVENTION--

In the English translation document, please amend the paragraph at page 4 lines 22-31, as follows:

The object of the invention is therefore to avoid interfering interruptions to the ISDN transmission on subscriber access lines caused by the activation or deactivation of the xDSL transmission, more particularly of the xDSL line drivers. The object is achieved on the basis of a communication arrangement, and a transmission device, and a circuit arrangement according to the features of the ~~preamble of patent claims 1 and 8 by the characterizing features in each case. The object is further achieved by a circuit arrangement which can be connected to the transmission unit according to the features of patent claim 13.~~

In the English translation document, please amend the paragraph at page 5 lines 27-31, as follows:

Further advantageous embodiments of the communication arrangement according to the invention and a transmission device for sending and/or receiving information and a circuit arrangement which can be connected to the transmission device can be derived from the dependent further claims.

In the English translation document, please add the section heading and paragraph at page 5 line 32, as follows:

--BRIEF DESCRIPTION OF THE DRAWINGS

- Fig 1.     Illustrates a connection scenario currently used in existing subscriber access networks.
- Fig 2.     Illustrates an exemplary embodiment of the communication arrangement in accordance to the invention.--

**Serial No. Not Yet Assigned**  
**Atty. Doc. No. 2002P14200WOUS**

In the English translation document, please add the section heading at page 5 line 32,  
after the newly added BRIEF DESCRIPTION OF THE DRAWINGS section as follows:

--DETAILED DESCRIPTION OF INVENTION--
